

**Amendments to the Claims**

This listing of claims supersedes all prior listing of claims.

1. (Currently Amended) A portable electronic device, comprising:

- a. a display, wherein the display is visible to a user; and
- b. a power source;

wherein the portable electronic device presents safety information pertaining to the power source on the display when the portable electronic device is turned from OFF to ON, further wherein the portable electronic device is capable of detecting whether the power source has been decoupled since a last time the portable electronic device was turned off.

2. (Cancelled)

3. (Cancelled) ~~The device of claim 1, wherein the device is capable of detecting whether the power source has been decoupled since the device was turned off.~~

4. (Currently Amended) The device of claim ~~3~~ 1, wherein the presentation of safety information occurs when the following have occurred:

- a. the power source has been decoupled since the device was turned off; and
- b. the device is turned on.

5. (Currently Amended) The device of claim 1 ~~2 or claim 3~~, wherein the safety information remains visible on the display until a user inputs information into the device.

6. (Original) The device of claim 5, wherein the inputted information is selected from the group consisting of an acceptance of the safety information and a rejection of the safety information.

7. (Original) The device of claim 6, wherein when the inputted information comprises the rejection of the safety information, the device turns off.

8. (Original) The device of claim 1, wherein the device is capable of identifying the power source coupled thereto.

9. (Original) The device of claim 8, wherein when the power source is identified, safety information of a first type is presented on the display, further wherein the power source is not identified, safety information of a second type is presented on the display.

10. (Original) The device of claim 1, wherein the power source comprises a rechargeable battery.
